Debian-Med BOF

Andreas Tille

Debian

Debian Conference 7, Edinburgh, 18. June 2007

Structure

1. Where we come from

2. Where we are

3. Where we go to

Past (2001)

- Packages: 4 biology related packages, partly orphaned
- An idea inspired by some Bordeaux wine ...

Past (2001)

- Packages: 4 biology related packages, partly orphaned
- An idea inspired by some Bordeaux wine ...

Present (2007)

- Packages: 40 biological, 9 medical imaging, 1 practice management, . . .
- System of meta packages drawing the stuff in
- User menus
- Website, mailing list, group of people

Future

Preclinical EMBOSS and friends, solve marge data issue

Clinical applications GNUmed server and other practice management systems, medical billing; MUMPS/VISTA

Medical research NetEpi, R-tools,

CDD issues More advanced CDD techniques (automatic website generation, better desktop integration, . . .)

Communication IRC meetings

Distribution Installer CD, Live CD, getting Debian-Med visible in general Debian installation
