Navigation

technical enable referencing certain pages

- Navigation menu with section and subsection on left side
- Alternatively Navigation on top but wasting space for content
- Get rid of lower navigation symbols `\setbeamertemplatenavigation symbols`

popular just informative, less references

- Informational line at bottom
- Only frame number

Bullets

1. Be friendly and cuddly - rounded bullets
   `\useinnertheme[shadow]{rounded}`

   Showing off with Debian's own bullets?

   Would require some programming

- Hard to implement
- Uncover items step by step
  `\beamerdefaultoverlayspecification{<+->}`
- Use grayed future items `\setbeamercovered{dynamic}`

Bullets

1. Be friendly and cuddly - rounded bullets

Logo and corporate design

1. Placement of logo?

2. Official or free logo or just
3. Colors for text and navigation area
4. Ask Debian-artists!

debian
